Research Letters

Somatic recombination and mutation assays in Drosophila: A comparison of the response of two different strains to four mutagens (MTRL 0128)
by J. Clements and E.W. Vogel (Great Britain and The Netherlands) 1

Effect of antiserum against aflatoxin B_1 — bovine serum albumin complex on aflatoxin B_1-induced lysogenesis (MTRL 0129)
by E.A. Odugbesan, O.A. Osowole and A.O. Uwaifo (Nigeria) 7

Mutagenicity of saccharin in a human cell strain (MTRL 0130)
by H. Suzuki and N. Suzuki (Japan) 13

Mutagenesis of xeroderma pigmentosum fibroblasts by acrolein (MTRL 0131)
by R.D. Curren, L.L. Yang, P.M. Conklin, R.C. Grafstrom and C.C. Harris (U.S.A. and Sweden) 17

Benzene and the genotoxicity of its metabolites
II. The effect of the route of administration on the micronuclei and bone marrow depression in mouse bone marrow cells (MTRL 0132)
by R. Ciranni, R. Barale, G. Ghelardini and N. Loprieno (Italy) 23

Fecapentaene causes sister-chromatid exchanges in human lymphocytes (MTRL 0133)
by M. Bauchinger, R. Bartha, E. Schmid and H.R. Pfaendler (F.R.G.) 29

Analysis of human plasma as an exposure level monitor for carcinogenic tryptophan pyrolysis products (MTRL 0134)
by S. Manabe and O. Wada (Japan) 33

Is dichlorvos a carcinogenic risk for humans? (MTRL 0135)
by J.N. Bremmer, A.I.T. Walker and P. Grasso (The Netherlands and Great Britain) 39

Differential effects induced by *N*-hydroxy-2-acetylaminofluorene and *N*-hydroxy-2-aminofluorene in DNA excision-repair-deficient Chinese hamster cell (MTRL 0136)
by R.T. Okinaka, T.W. Whaley and G.F. Strniste (U.S.A.) 45

Deoxynucleoside triphosphate pool perturbation is not a general feature in mutagen-treated mammalian cells (MTRL 0137)
by R.D. Snyder and G.F. Davis (U.S.A.) 51

Verapamil as a co-mutagen in the Salmonella/mammalian microsome mutagenicity test (MTRL 0138)
by L.R. Ferguson and B.C. Baguley (New Zealand) 57

Enhanced mutagenesis during post-treatment incubation of *Escherichia coli* treated with *cis*-diamminedichloroplatinum (II) (MTRL 0139)
by H. Razaka, G. Villani, J.S. Hoffman, M. Defais and N.P. Johnson (France) 63

Relationships between structure of nitrated arenes and their mutagenicity in *Salmonella typhimurium*; 2- and 2,7-nitro substituted fluorene, phenanthrene and pyrene (MTRL 0140)
by T. Hirayama, T. Watanabe, M. Akita, S. Shimomura, Y. Fujioka, S. Ozasa and S. Fukui (Japan) 67

Cytotoxic and genotoxic effects of bromodeoxyuridine during in vitro labeling for sister-chromatid differentiation in preimplantation mouse embryos (MTRL 0141)
by R. Vogel and H. Spielmann (F.R.G.) 75

N-Nitroso-butyl-3-carboxypropyl-amine (BCPN), a urinary bladder carcinogen, non-mutagenic in *S. typhimurium* (MTRL 0142)
by B.L. Pool, J. Gottfried-Anacker, G. Eisenbrand and C. Janzowski (F.R.G.) 79

γ-L-Glutamyl-taurine (Litoralon®) prevents the micronucleus formation induced by mitomycin C (MTRL 0143)
by S. Tóth and G. Csaba (Hungary) 85

Cytogenetic effects of acrylamide in the bone marrow of mice (MTRL 0144)
by R. Čihák and M. Vontorková (Czechoslovakia) 91

Editorial Announcement iii

Research Letters

Formation of a diazoquinone-type mutagen from acetaminophen treated with nitrite under acidic conditions (MTRL 0145)
by T. Ohta, H. Oribe, T. Kameyama, Y. Goto and S. Takitani (Japan) 95

Ultraviolet mutagenesis of radiation-sensitive (*rad*) mutants of the nematode *Caenorhabditis elegans* (MTRL 0146)
by T. Coohill, T. Marshall, W. Schubert and G. Nelson (U.S.A.) 99

Mutagenicity testing of vincristine sulfate in germ cells of male mice (MTRL 0147)
by U.H. Ehling, J. Kratochvilova, W. Lehmacher and A. Neuhäuser-Klaus (F.R.G.) 107

Relationships among direct-acting mutagenicity, nitro group orientation and polarographic reduction potential of 6-nitrobenzo[*a*]pyrene, 7-nitrobenz[*a*]anthracene and their derivatives (MTRL 0148)
by P.P. Fu, R.H. Heflich, L.E. Unruh, A.U. Shaikh, Y.-S. Wu, C.-C. Lai and J.-S. Lai (U.S.A. and Taiwan) 115

Nitroreduction of 6-nitrobenzo[*a*]pyrene: a potential activation pathway in humans (MTRL 0149)
by P.P. Fu, C.E. Cerniglia, K.E. Richardson and R.H. Heflich (U.S.A.) 123

Frequencies of micronuclei detected on *Mytilis galloprovincialis* by different staining techniques after treatment with zinc chloride (MTRL 0150)
by F. Majone, C. Beltrame and R. Brunetti (Italy) 131

The clastogenic activity of 1,6-dinitropyrene in peripheral human lymphocytes (MTRL 0151)
by K. Adams, A. Lafi and J.M. Parry (Great Britain) 135

Heat shock protection against induction of chromatid aberrations is dependent on the time between heat shock and clastogen treatment of *Vicia faba* root tip meristem cells (MTRL 0152)
by R. Rieger and A. Michaelis (G.D.R.) 141

DNA damage in stomach, kidney, liver and lung of rats treated with atrazine (MTRL 0153)
by A. Pino, A. Maura and P. Grillo (Italy) 145

DNA damage and repair induced in vitro by nitrilotriacetic acid (NTA) in human lymphocytes (MTRL 0154)
by L. Celotti, D. Furlan, P. Ferraro and A.G. Levis (Italy) 149

The evaluation of genotoxic activities of disinfectants and their metabolites by *umu* test (MTRL 0155)
by Y. Sakagami, H. Yamazaki, N. Ogasawara, H. Yokoyama, Y. Ose and T. Sato (Japan) 155

Mutagenicity studies on paracetamol in human volunteers
I. Cytogenetic analysis of peripheral lymphocytes and lipid peroxidation in plasma (MTRL 0156)
by J. Kočišová, P. Rossner, B. Binková, H. Bavorová and R.J. Šrám (Czechoslovakia) 161

Use of cryopreserved hepatocytes for unscheduled DNA synthesis assays (MTRL 0158)
by S.H.H. Swierenga, F.J. Lee and S.H. Hasnain (Canada) 167

1,3-Butadiene: induction of micronucleated erythrocytes in the peripheral blood of B6C3F_1 mice exposed by inhalation for 13 weeks (MTRL 0159)
by P.P. Jauhar, P.R. Henika, J.T. MacGregor, C.M. Wehr, M.D. Shelby, S.A. Murphy and B.H. Margolin (U.S.A.) 171

Inhalation exposure-rate of ethylene oxide affects the level of DNA breakage and unscheduled DNA synthesis in spermiogenic stages of the mouse (MTRL 0161)
by G.A. Sega, E.E. Generoso and P.A. Brimer (U.S.A.) 177
